

SECTION A: ERROR DETAILS

 Bugzilla Error Number **BUG4732**

Description of Error:

Results Report: All Components of a Type in a table only updates value of first component.

Comments:

If you create a table and in the Excel reporting and report all the components of a certain type, only the value of the first component gets written to the table. The values from simulations run in previous version of Flownex will still reflect in the remaining rows of the table.

First Incorrect Version:	2025 Release (9.0.0)	Corrected Version:	2025 Update 1 (9.0.1)
